Whether you need a new website or help with an ineffective one or an attractive brochure to tell the world what you do, then let the professionals at Commando Inc. Marketing bring you their expertise at helping you to increase your organizations visibility and attract new business.

HOW CAN WE HELP YOU?

Does you need a website or do you want a BETTER site that attracts the right customers/patients?

The World Wide Web lets you reach your audience anywhere in the world, anytime. Our online experts design your site to lead clients through every part of your message, using both graphics and text. We make sure it's easy for your visitors to navigate. Then it's all about clearly communicating your message, and how comfortable they are with you. And that leads to sales.

We offer the following services:

* **Website Consultation:** Do you have questions concerning the type of site that you require or the structure of navigation that might assist your clients or customers in finding the information that they need? We can assist you with advise on what your website needs to be a success - whether you need a site created for you from the ground up or a redesign of a site that's already in place.

* **Web Design and Re-Design:** Whether you need a website designed for you or you have an old, tired website in need of an update, Commando Inc. Marketing can put together an eye-catching site with state of the art navigation and menus that will allow visitors to painlessly find anything that they are looking for about you. We will also create a site optimized for the many different search engines on the web to allow you the highest possible listing for your business. We would be happy to provide you with a proposal and quote.

* **Website Content Management:** You have a website, but perhaps you do not have the time or technical abilities to update it on a regular basis. Commando Inc. Marketing can help you with the ongoing content maintenance and management of your website. We can change your text and graphics when you require a site update.

* **Social Media:** Do you require a presense on FaceBook, LinkedIn, or Twitter. We can set it up for you and even keep up with your updates if you like.

Do you need a brochure to describing your services to your customers?

We partner with you to create great written materials that grab attention and quickly explain the benefits that your business has to offer. Through effective design and intuitive copy, we drive home the most effective reasons why your prospective customers should consider doing business with you.

One piece going out one way may not be enough. We create whatever's right for your business - a brochure with all your product benefits and specifications, a flier to tease prospects into calling, a newsletter to educate customers and remind them you're there, and business cards that are mini ads.

We offer the following services:

* **Brochures:** A great brochure is worth its weight in gold. Let us design a brochure that puts forth your message with both content and style. We can create printed brochures and/or brochures in .pdf format that can be posted on your web site for download or emailed directly to potential customers.

* **Newsletters:** Newsletters provide an opportunity to inform your customer base and prospective customers of your opinions on a wide variety of matters. By engaging prospects and customers in such conversations, you can increase your selling time and accelerate your success.

* **Direct Mail:** Now that many companies have abandoned direct mail in favor of electronic marketing, direct mail is more effective than ever. Smart companies know that direct mail works, and we help smart companies make the most of this highly effective marketing channel.

* **Logo Design:** A well designed company logo is an important part of building your brand and creating a corporate identity. With our guidance you will successfully portray the image that is right for you. This will build brand recognition and differentiate your business from your **competitors**.

Are you looking to advertise and promote your organization?

Our staff has more than 20 years experience in the field of marketing. If you are looking to send your organization on a completely new direction, or if you are looking for help maintaining the direction that you are already set into, then Commando Inc. Marketing can help you achieve your goals. We are a traditional firm that specializes in the capability to "think outside the box". We won't be there pounding on the same doors and retrying the same tired ideas. We offer a fresh slant that we hope will energize your brand and your bottom line.

We offer the following services:

* **Consulting:** We can come to your office and offer our expertise to you in the direction that your marketing and advertising plans should follow.

* **Marketing Plans:** We will draw up a complete marketing plan for you. This will include plan budgeting, Market Research and analysis, targets, and goals.

* **Print Advertising:** Commando Inc. Marketing offers a full creative and production service. From conception to inception, we will take you through the creative process until we have created your perfect ad.

* **Corporate Branding:** Of all the roles marketing plays within the business communications mix, brand development is arguably the most valuable. In today's highly competitive marketplace, it's more important than ever to establish a unique identity. The logo, for example, is the point of entry to the brand. From a website to a business card, data sheets, invoices, and press releases, a logo must be recognizable, consistent, differentiated and help build customer loyalty and generate sales.

So whether you need help with corporate identification programs (e.g., logo, tagline and messaging development), collateral materials, stationery, white papers, advertising campaigns or annual reports, Commando Inc. Marketing's experienced team can help.

Our team's experience in both print and online design enables us to build a comprehensive and integrated approach that is consistent with your objectives.

Done right, your corporate identity should help you stand out from the crowd, and effectively communicate your brand to your audience.
